Non-contract formulas are allowed when a prescriptive authority: (1) completes a Medical Documentation for Formula Substitution form for a non-contract brand formula documenting a medical reason for the substitution, or (2) provides documentation of the brand name of the authorized WIC formula, the medical diagnosis, length of time needed, and signature of the provider. The WIC staff person has the option to provide, on an individual basis, additional formula for children over age 1 and women with special nutrition needs.
